

Dear Hiring Team at Orsted Education,

I am writing to express my interest in applying for the STEM Tutor position at Orsted Education. I am an undergraduate Mathematics student at Institut Teknologi Sepuluh Nopember (ITS) with a strong interest in mathematics, education, and STEM learning.

Throughout my studies, I have developed a foundation in mathematics, programming, data analysis, and problem-solving. I have also gained experience working with tools such as Python, Matlab, Excel, and various digital platforms. These experiences have strengthened my analytical thinking and taught me how to approach problems systematically.

Although my academic background is primarily in Mathematics, I have a strong interest in education and enjoy helping others understand mathematical and technical concepts. Through my experiences in volunteer teaching and organizational activities, I have learned how to communicate ideas clearly and adapt explanations to different levels of understanding. I believe that learning STEM should not only focus on finding the correct answer, but also on developing curiosity, logical thinking, and confidence in solving problems.

I am particularly interested in joining Orsted Education because I see this opportunity as a way to combine my passion for STEM with my interest in education. I am eager to contribute to creating an engaging learning environment while continuously developing my own teaching and communication skills.

I would be grateful for the opportunity to discuss how my background and skills could contribute to Orsted Education. Thank you for considering my application.

Sincerely,

Ariska Nurdyanti
Undergraduate Mathematics Student
